

Mikael Hagman

Technical Vehicle Consultant

INTRODUCTION

Diagnostics and test engineer with 25+ years in advanced automotive diagnostics and high-voltage EV systems, including 2.5 years focused on test-rig/vehicle verification, structured fault tracing, software downloads/ECU upgrades and defining DTCs/DIDs. Strong aftermarket background from hands-on workshop roles to OEM test support, bridging users, vehicles and tools. Skilled with VIDA, TIE, Tacadis, Teamcenter/CAD, CAN/LIN network troubleshooting and cross-functional collaboration across Sweden–China. High-voltage certified (AEVT). Passionate about delivering reliable solutions for the aftermarket.

WORK EXPERIENCE

Diagnostic Engineer – Volvo Cars (Consultant via NSC Sweden Consulting AB)

2024 – Present

- Plan and execute fault tracing on test vehicles; isolate root causes using CAD reviews in Teamcenter and close coordination with design and China production teams.
- Contribute across the full diagnostic lifecycle: author design/customer function documents; define DTCs/DIDs for multiple ECUs; create component test scripts.
- Perform ECU upgrades from TT to PP series; validate software/feature readiness.
- Diagnose and troubleshoot vehicle networks, including CAN/LIN connections.

Test Support Engineer – Zeekr (via NSC)

2022 – 2023

- Secure test object uptime (vehicles & rigs) through software/hardware updates, maintenance, and repairs.
- Conduct mechanical/electrical fault tracing and corrective actions.
- Manage test object lifecycle from delivery/service to end-of-life.
- Prepare test and measurement equipment for development projects; support suppliers and expeditions; report issues to design departments.

Consultant Manager

Jesper Mattsson

0723421736

Diagnostic and Service Technician – Volvo Car

2018 – 2022

- Owned the end-to-end customer workshop journey with specialization in troubleshooting and servicing fully electric vehicles.
- Performed advanced diagnostics, repairs, and software tasks to restore drivability and customer satisfaction.

Service Technician – Göteborgs Stads Leasing

2002 – 2018

- Transitioned from passenger cars <3.5t to a dedicated EV/HEV department.
- Diagnosed and repaired electric/hybrid vehicles; supervised workshop operations and workflow.

Service Technician – Scania Göteborg

1996 – 2002

- Service and maintenance for Mazda and Jaguar, including major engine renovations and system repairs.

EDUCATION

ESS – Energy/Battery Storage Systems (Yrkeshögskolan) • 2024

- Specs, safety standards, and evaluations; cell chemistry/performance/packaging; pack requirements and architecture; BMS; vehicle battery systems with standards, testing, and comparisons to e-motors/inverters incl. BMS control.

Vehicle Technology – Lindholmens Tekniska Gymnasium • 1993 – 1996

COURSES & CERTIFICATIONS

- AC-Certification
- Active & Passive Safety
- Advanced Troubleshooting; Logical Troubleshooting
- VIDA, LCDS, DSA; DSA & LCDS (Diagnostics & Software Fault Tracing)
- Certified Electromobility
- EVT, AEVT, Polestar, BEV (High-Voltage System Certifications)
- Electrical Basics for Cars
- High Voltage Technology
- Wiring Diagram

TOOLS & PLATFORMS

Off-board/aftermarket tools: VIDA, TIE, Tacadis (quick to onboard new tools used in aftermarket environments).

Vehicle platforms: PMA, CMA, SPA2 (Volvo/Polestar).

Networks & architecture: CAN/LIN diagnostics, HV system safety and BMS principles.

ECU/software operations: DTC/DID definition, ECU flashing/upgrades, component test scripts, parameterization, verification on rig & vehicle.

Data/CAD: Teamcenter for CAD review during fault isolation.

OTHER

Engines, motorcycles, and trucks enthusiast. Passionate motorcycle builder since teenage years. Lives in Svartedalen with partner and two children.

Swedish B drivers license.
